

SMART INDIA HACKATHON 2025

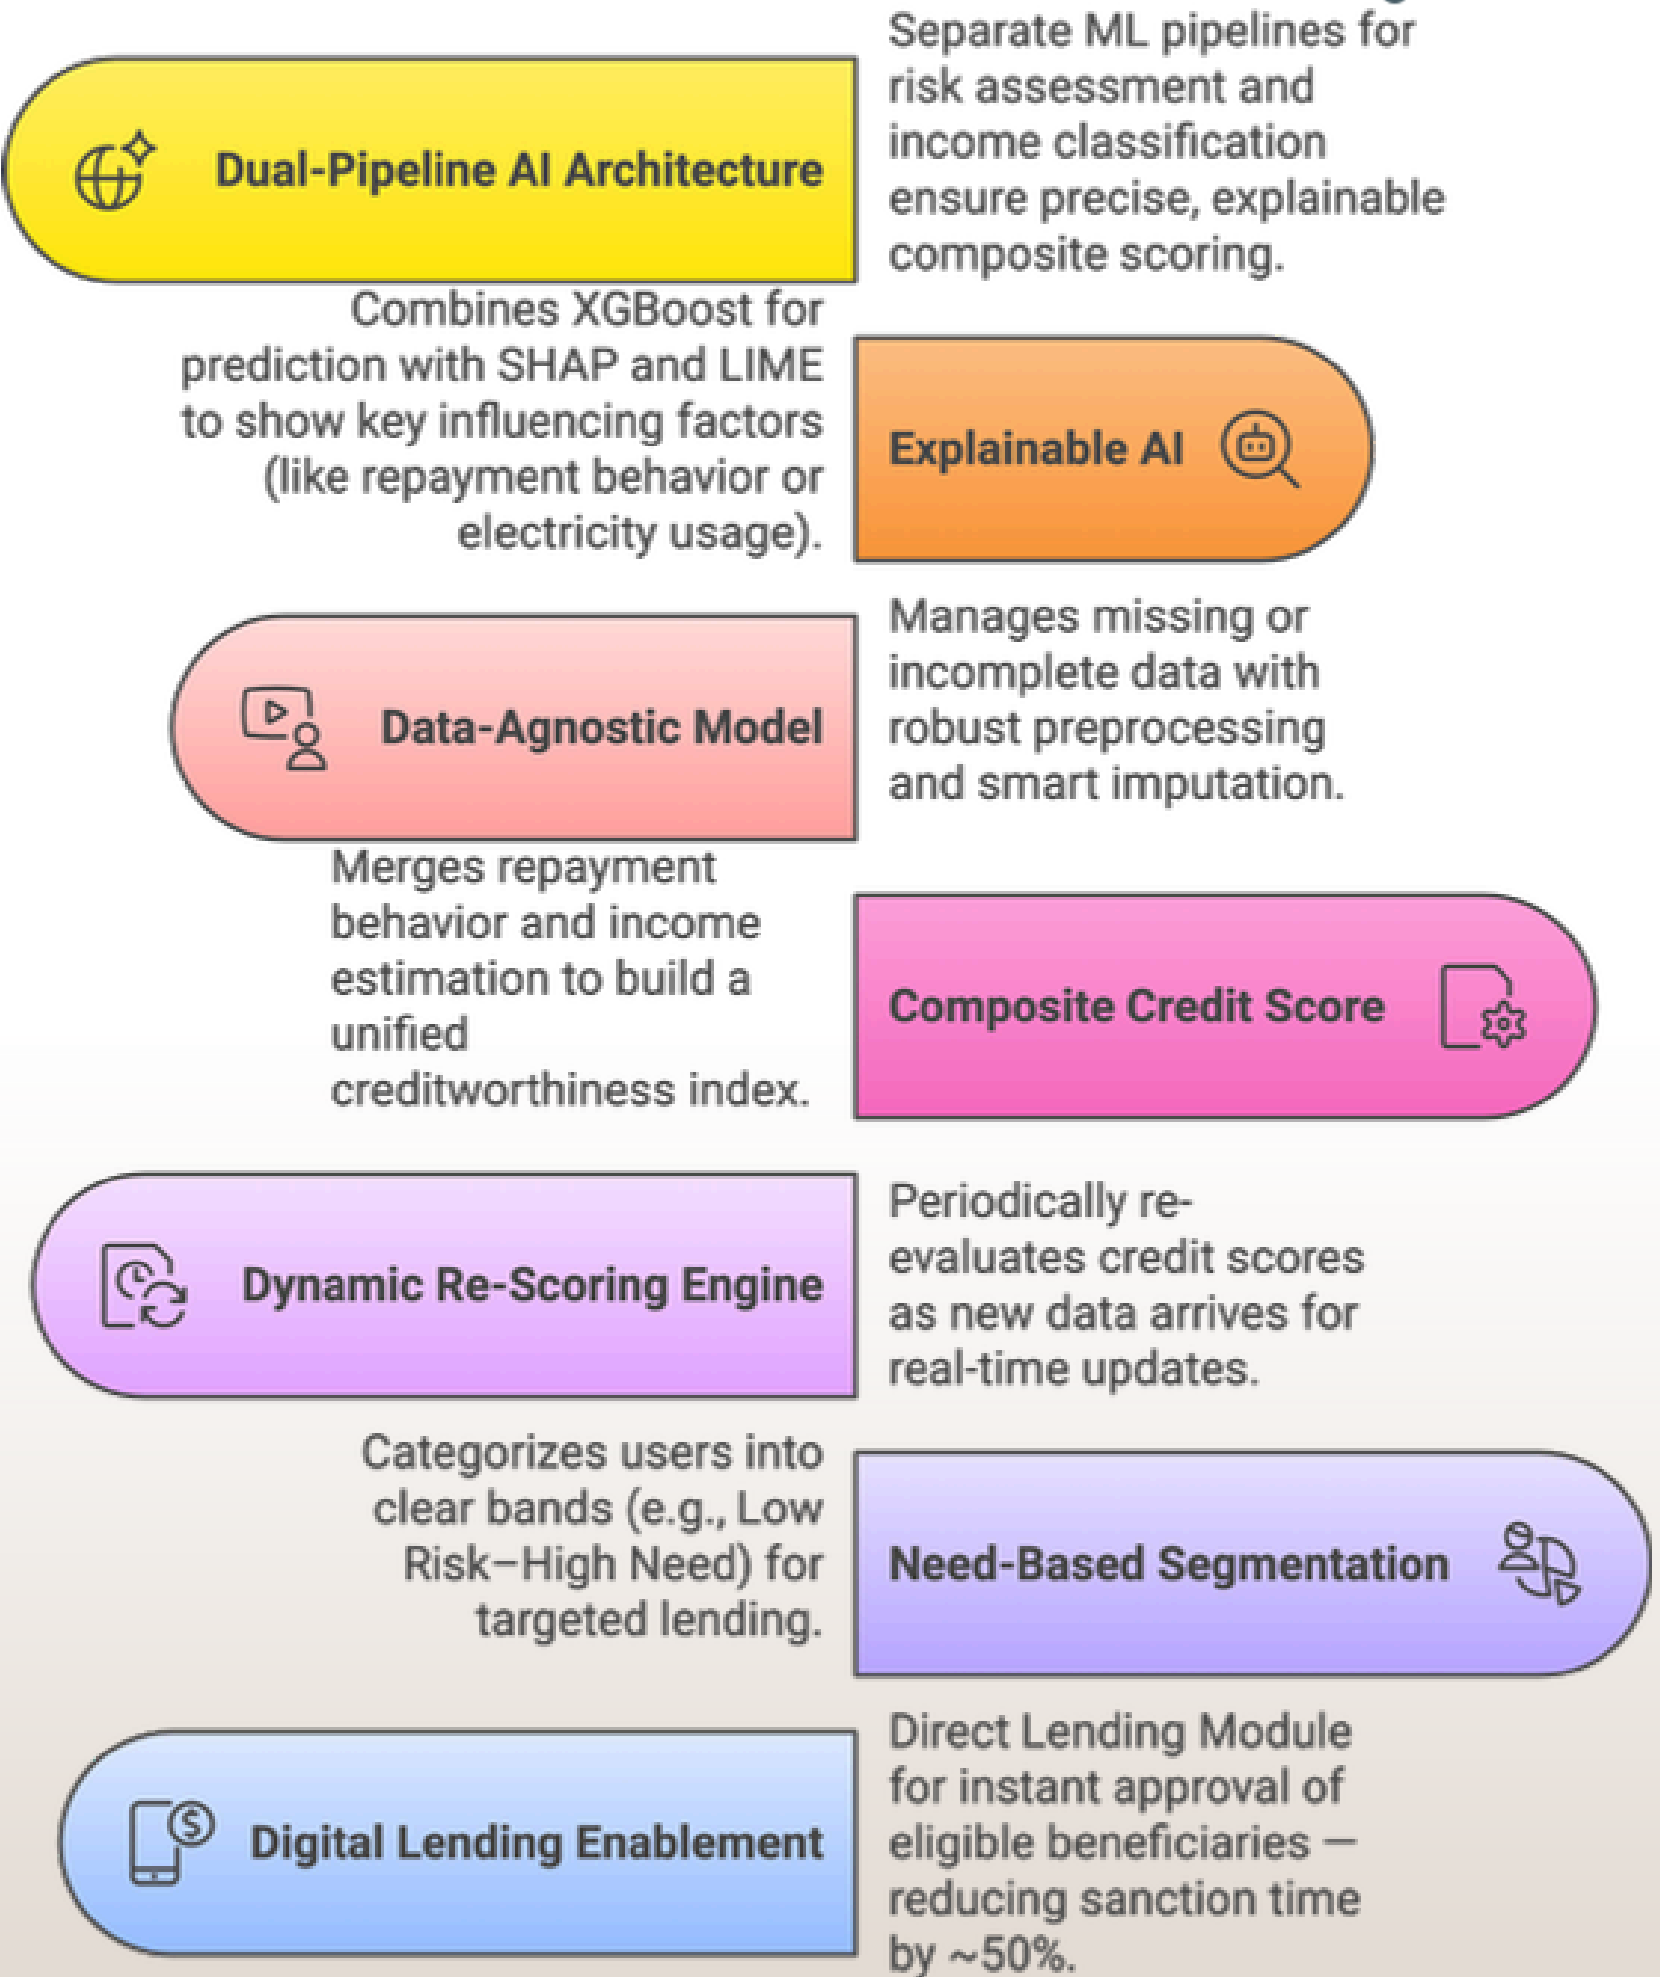

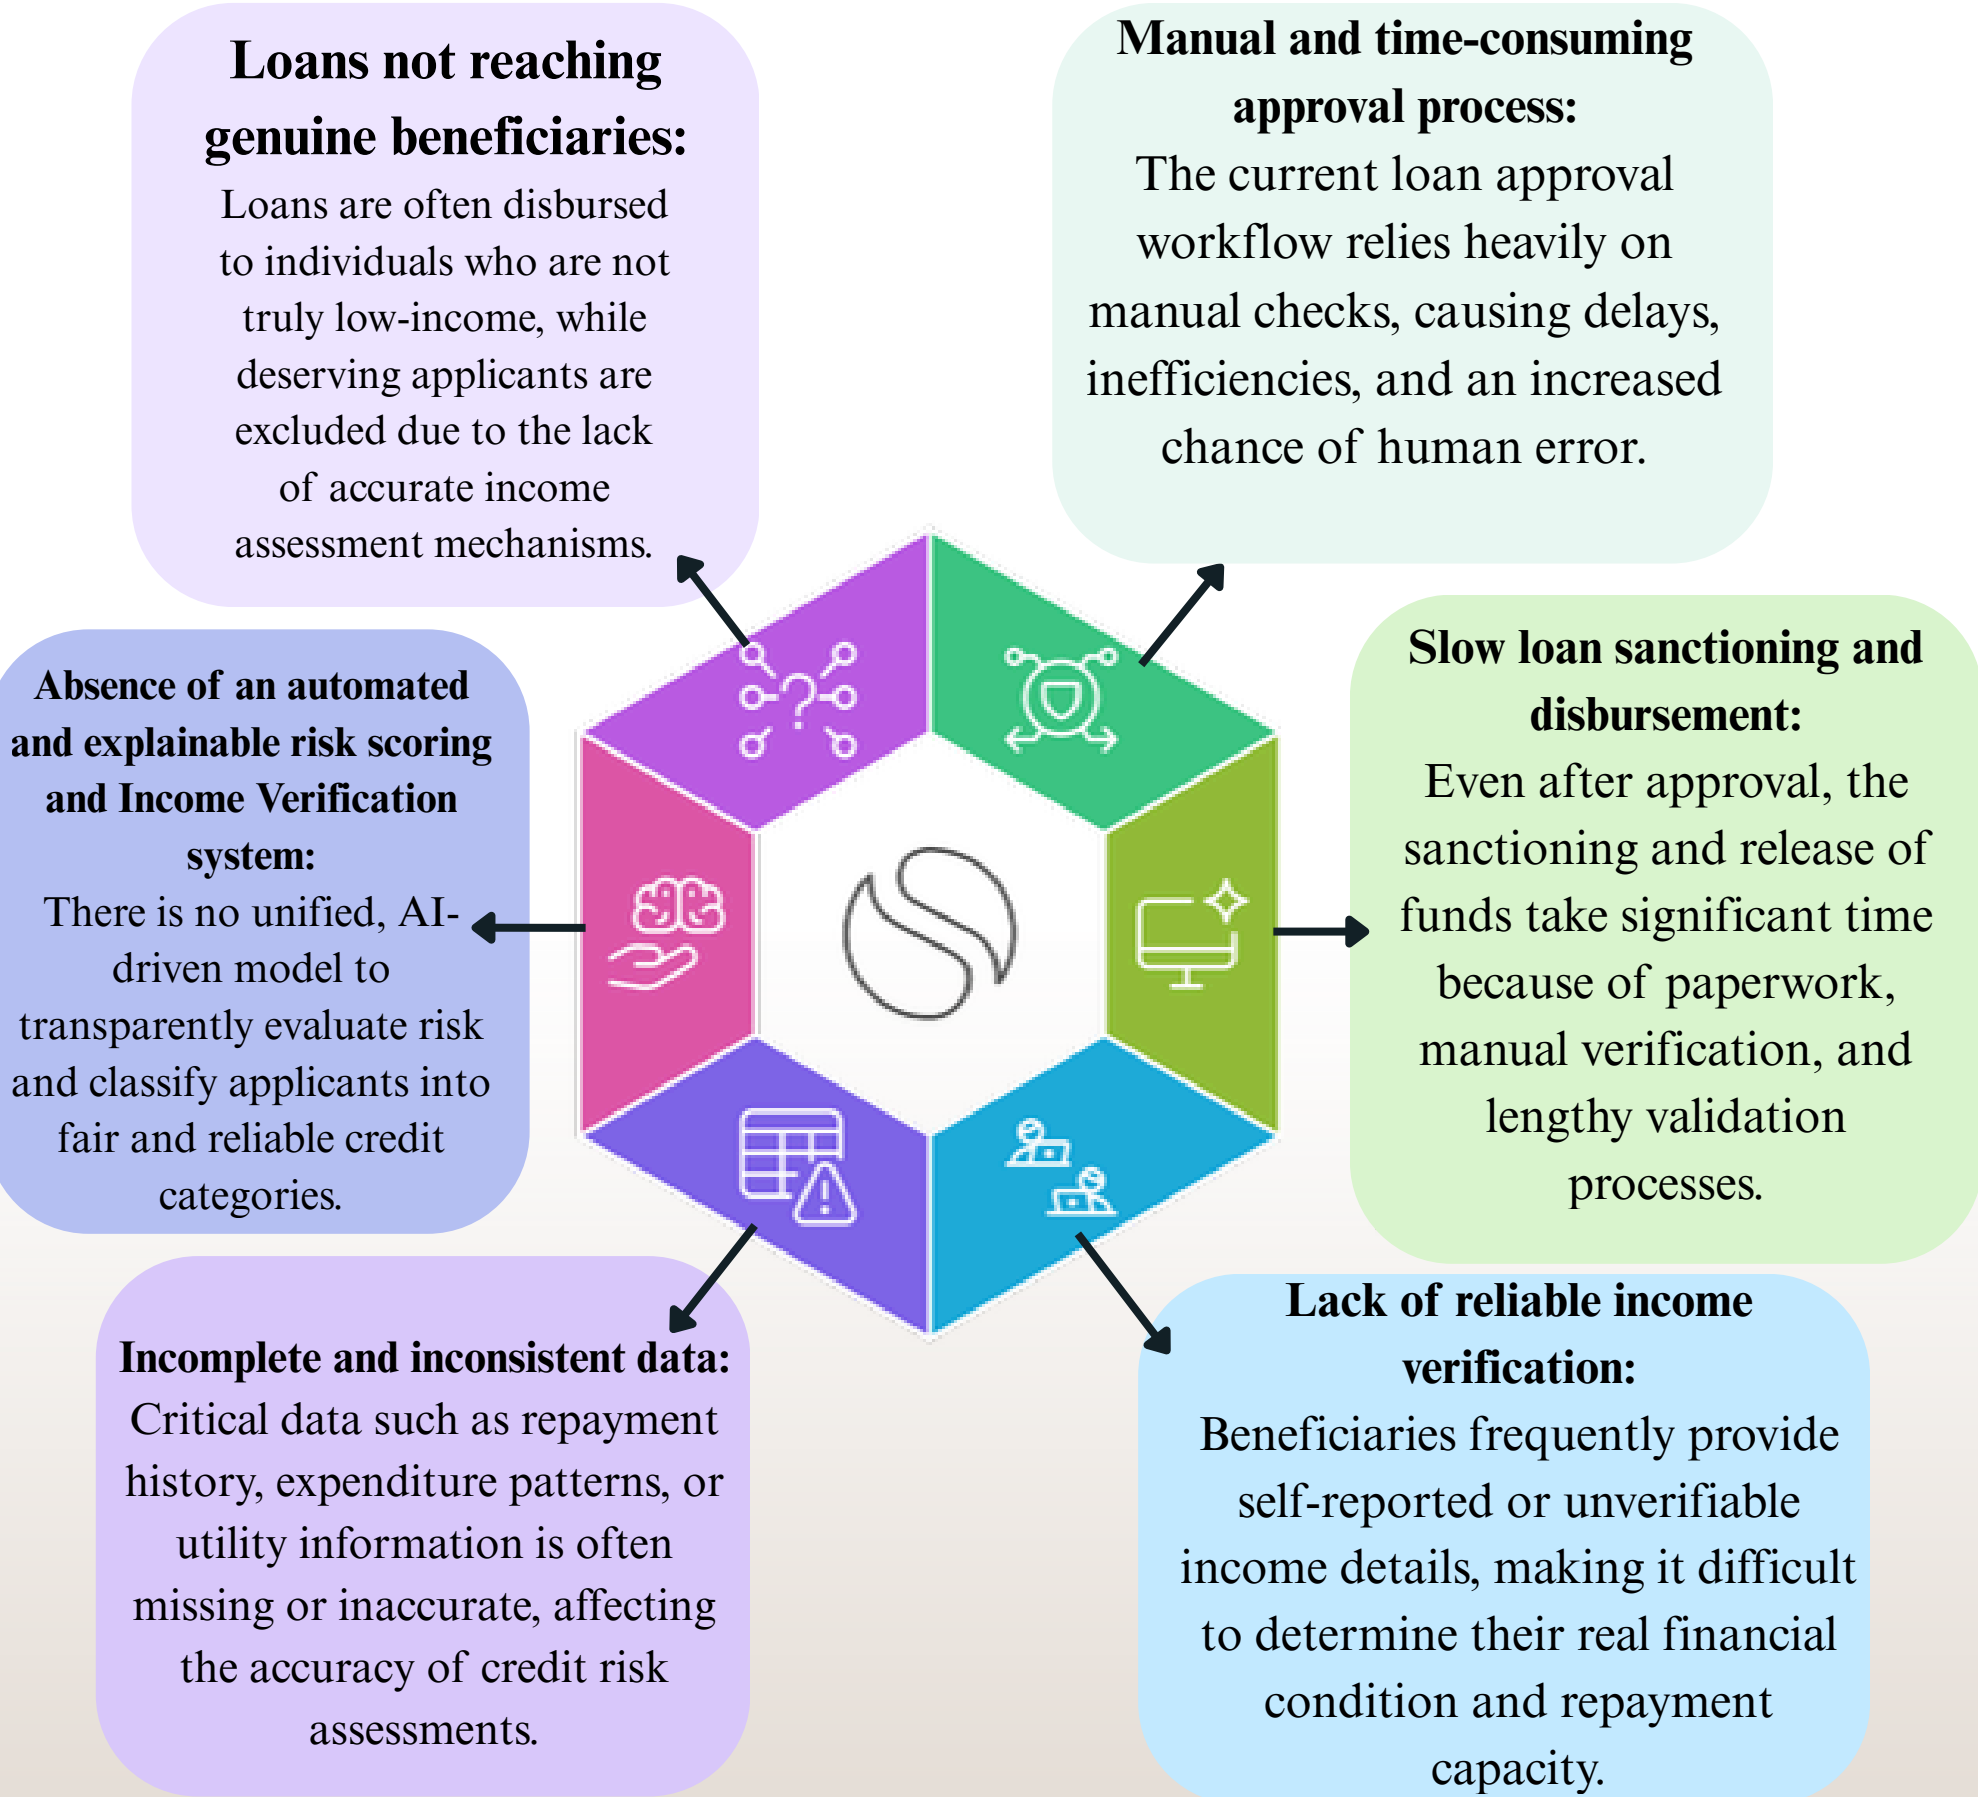

UDAAN!

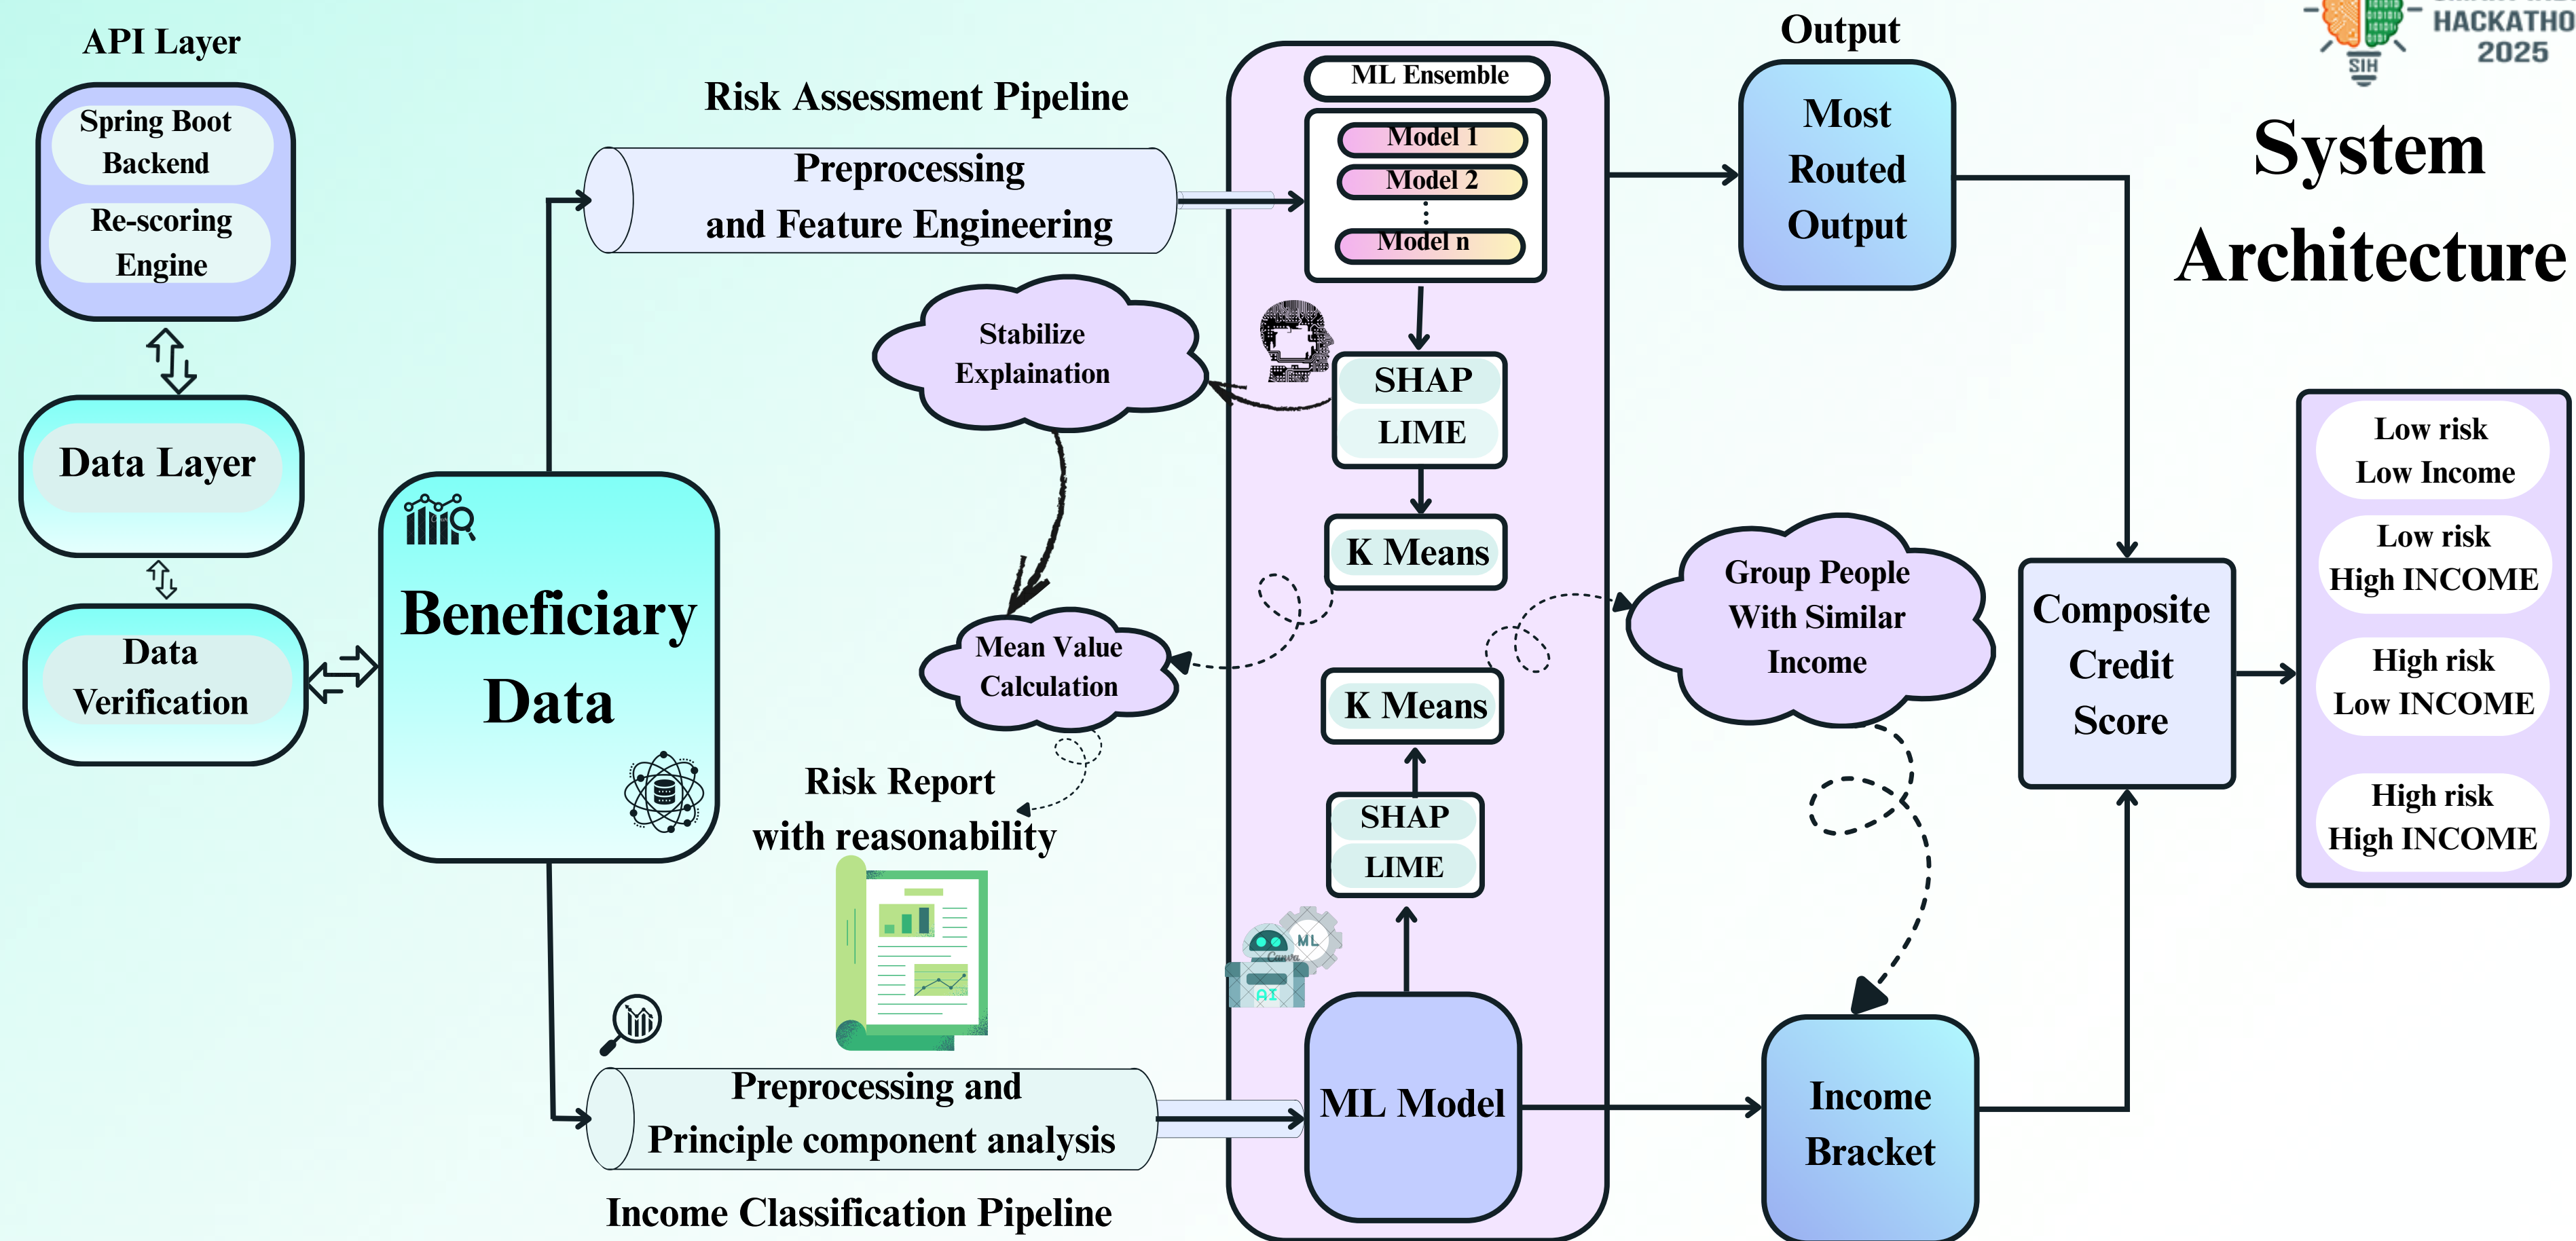

- **Problem Statement ID:** 25150
- **Problem Statement Title:** Beneficiary Credit Scoring with Income Verification Layer for Direct Digital Lending
- **Theme:** Smart Automation
- **PS Category:** Software
- **Team ID:** BMS/SIH2025/07
- **Team Name:** UDAAN!

Problems

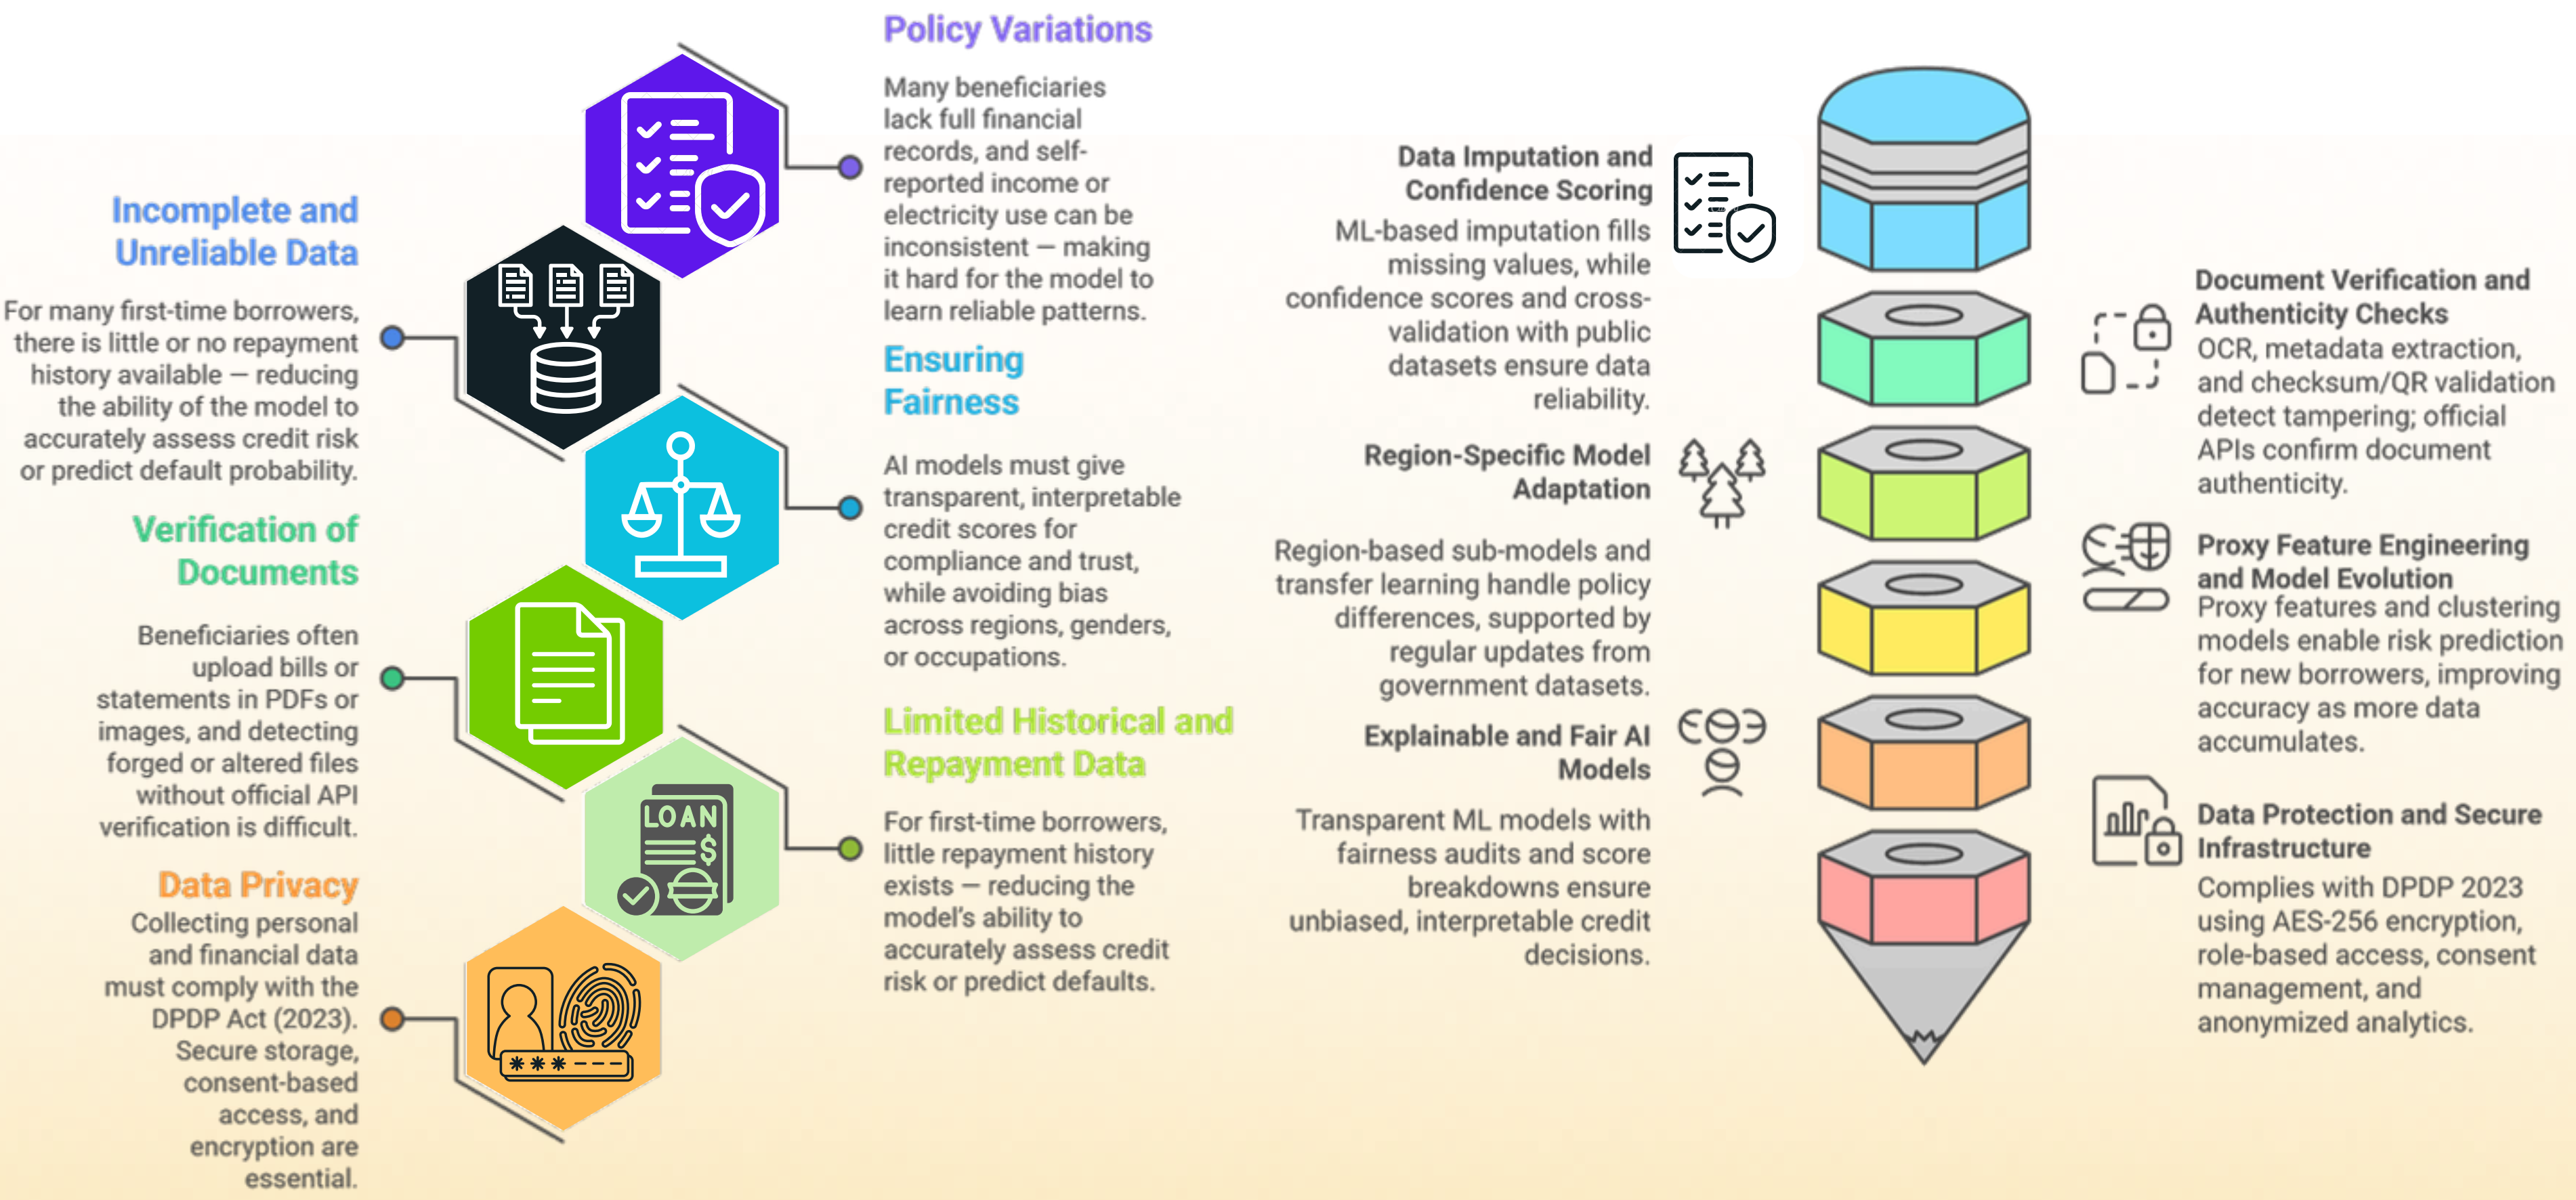

System Architecture

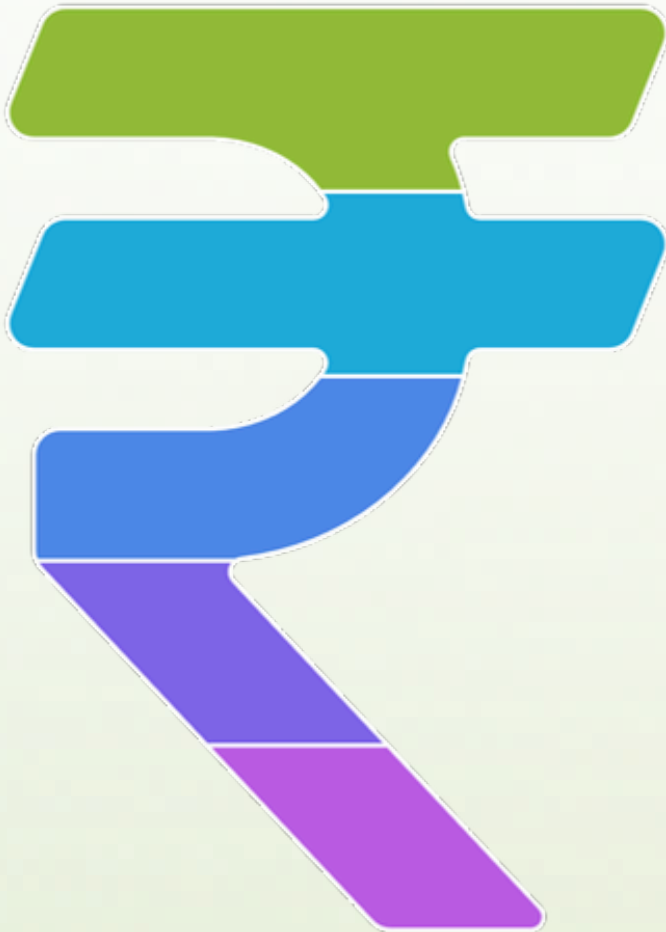

Potential Challenges

How we Tackle Them?

Economic Impacts

Financial Inclusion

Enables access to formal credit for marginalized groups

Poverty Alleviation

Provides microloans to boost income stability

Digital Literacy

Encourages adoption of digital tools

Equitable Access to Resources

Ensures fair allocation of loans based on need

Community Upliftment

Improves trust and financial behavior in local communities

Social Benefits

Expand Reach

Enables nationwide access without physical infrastructure.

Accessible Credit

Ensures responsible and fair lending.

Lower Risk

AI detects defaults and anomalies early.

Efficient Lending

Automation streamlines loan processes.

Enhance Trust

AI improves credit assessment reliability.

Optimize Programs

Real-time data insights for better decisions.

ML Model RESEARCH

Credit Scoring Using Alternative Data Sources: A Machine Learning Approach

Enhancing Credit Risk Prediction through an Ensemble of Explainable
